Kaizen Environmental
Services (Trinidad) Ltd.

IN THIS ISSUE

The **EnviroPRODUCTS** Sales & Rental Division is a recent development within the Kaizen organization. **EnviroPRODUCTS** seeks to develop partnerships with customers.

- By offering a wide array of measurement equipment, such as, portable and fixed gas detection systems, noise monitors, aerosol and dust detection systems, meteorological systems and other environmental and safety equipment.
- **EnviroPRODUCTS** works closely with customers to understand their needs supplying support in; training, calibration, technical support and rapid customer response.

At **EnviroPRODUCTS** our first priority is to keep our entire rental equipment inventory client ready. All equipment must be calibrated and running trouble-free ensuring maximum accuracy and performance for our clients.

EnviroPRODUCTS

The **EnviroPRODUCTS** Division provides sales and rental of detection and monitoring systems, and a full inventory of spill response equipment and supplies.

EnviroPRODUCTS offers three distinct areas of environmental equipment and products:

- *Sensing / Monitoring Equipment Sales and Rental for detection and data acquisition.*
- *Oil Spill & Emergency Response Equipment and Supplies for incident clean-up .*
- *Specialty products; Containment Liners, Geotechnical Liners/ Material, H₂S Scrubbing Process, Proceptor Oil Separator.*

EnviroPRODUCTS Team

Mr. John Thomson
Operations Manager

Mr. Kelvin Ramnath
Equipment Technician

Ms. Shauna Narine
Environmental Technician

Mr. John Thomson joined the Kaizen family on May 1st 2005, in the capacity of Operations Manager of the **EnviroPRODUCTS** Division.

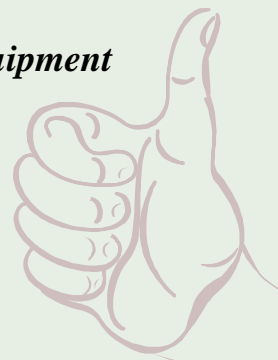

He has been employed for over ten (10) years in the sales, rentals and service divisions of both local and international corporations, servicing the petrochemical and oil & gas industries in Trinidad & Tobago and the Caribbean Region.

He brings with him knowledge and experience in a wide range of products and equipment ranging from hydraulic, pneumatic and industrial equipment, to electro-mechanical power and electrical distribution systems and microprocessor based programmable logic controllers.

WHY RENT?

If you...

- ...have a short term project*
- ...aren't sure if you want to purchase equipment*
- ...can't afford a large investment*
- ...don't want to deal with the hassle of maintenance & storage*

THEN RENTING IS RIGHT FOR YOU.....

Renting equipment is quickly becoming a popular alternative to owning equipment. More and more companies are switching to renting because of its many benefits.

The benefits of renting verses owning include:

- If equipment is used less than 70% of the year, then renting is less expensive than buying .

- Renting means the right equipment matches the right job. It ensures safety and efficiency and it will save money by avoiding many hidden costs incurred through misused equipment.
- Pay for what you use, not what you own.
- Renting gives you access to the newest and most appropriate equipment.
- Using the right equipment for the job will increase efficiency and save you money in the long run.

EnviroPRODUCTS

In addition to a wide selection of quality instruments,
The **EnviroPRODUCTS** Division also offers the following services:

FRIENDLY SUPPORT – CALL US ANYTIME

Your efficient and effective use of our rental equipment is important to us. Our knowledgeable staff can provide advice on instrument selection and applications. Technical support is just a phone call away.

INSTRUMENT SETUP & CALIBRATION

Each rental instrument undergoes a quality control check and calibration by our trained technicians.

ONE STOP SHOPPING

Most instruments are supplied with standard accessories such as a battery charging system. Many optional accessories, such as downloading cables, software, and others are also available.

DOWNLOADING SERVICE

Save time and effort! We can download your logged data. Ask us for details.

PICKUP AND RETURNS

Customers can take advantage of the added convenience of our equipment pickup and return service.

TRAINING

Our technical staff will provide operating instructions at no extra charge.

EQUIPMENT REPAIRS AND SERVICING

Shop services are provided by our trained technical staff. Rental equipment is available while your instruments are being serviced.

SPECIAL REQUESTS

EnviroPRODUCTS can help you choose the right tool for the job!

If we don't stock what you need, we can source other instruments and sampling supplies that are not shown in our catalog.
