

KaizenLAB *is pleased to offer*

MICROBIOLOGY TESTING SERVICES

at our new, fully equipped laboratory

Services offered:

- Total coliform
- Faecal coliform
- Escherichia coli (E. coli)

These are indicator organisms which indicate the presence of pathogens.

It is relatively easy and inexpensive to test for coliform bacteria compared to actual pathogens.

Applications:

- Ambient water
- Drinking water
- Process water (food and beverage)
- Wastewater
- Bathing waters
- Swimming pools/ whirlpools
- Salt/ brackish water
- Sediments/ sludges

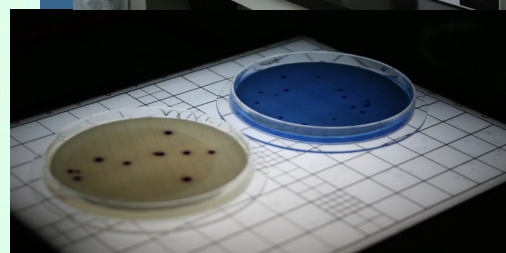

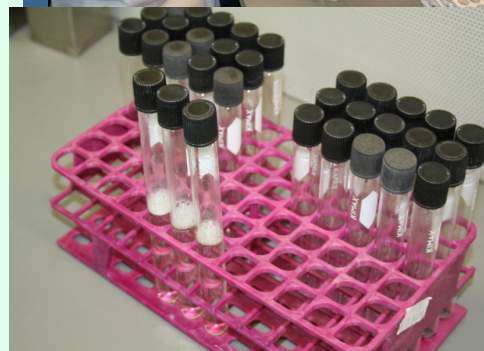

What can we offer?

- Variety of approved methods:

- Membrane Filter method
- Multiple Tube Fermentation method
- Enzyme Substrate method (using Colitag®)

- Rigorous QA/QC programme

- Sterile sampling containers and sampling services.
